Kontakt venligst CJE Information for yderligere information omkring Lenovo's professionelle notebook og PC løsninger

The Lenovo® ThinkPad® EDGE 11 laptop with Intel®Core™ i3 Processor

- Affordable Mobility
- Thin and Light - Starting at 2.9 LBS
- Up to 7 hours of Battery life
- Assured Reliability with Active Protective System™
- Stylish Design With a choice of Colors

Top Reasons to Own

ThinkCentre:																	
3. PC2-6400 and PC2-5300 memory can co-exist on the same system but will operate at the PC2-5300 speed.																	
5. Supports attachment of flat panel monitors with a 75mm or 100mm VESA mount. Weighs less than 10.9 kg (24.0 lbs) when desk mounted.																	
6. Compatible with L151, L151p, L171, L171p, L172, L174, L1700p, L190x, L191, L192p, L193p, L194 Wide, L197 Wide, L1900, L1940 Wide, L1940p Wide, L201p, L220x Wide, L200p Wide, L2240p Wide flat panel monitors																	
7. Attaching the cable lock to any ThinkCentre form factor not only secures the ThinkCentre to the work area, but it also prevents users from opening the chassis itself.																	
12. Compatible with L2440p Wide, L2440x Wide, L2251x Wide, L2251p Wide, L2250p Wide, L1951p Wide, L1900p, L1711p, L215p Wide, L215 Wide, D185 Wide flat panel monitors																	
13. Attaches to ThinkCentre's system DisplayPort or the installed DisplayPort graphics card. For more information, go to: www.lenovo.com/support/graphicscards or www.lenovo.com/support/monitoraccessories																	
15. USB-only attach																	
16. Attaches to the installed DisplayPort graphics card. For more information, go to: www.lenovo.com/support/graphicscards or www.lenovo.com/support/monitoraccessories																	
17. ThinkPad In-Ear Headphones has 1.2-meter (3.94-foot) cable length. Best suited when system is in close proximity of the system. For example: Small Form Factor (SFF)-on-desk-top environments.																	

ThinkStation:

3. Mixing of Serial ATA and SAS Hard Drives is not recommended. Most S-Series models are configured with Serial ATA Hard Drives, and most D-Series models are configured with SAS Hard Drives.

4. S-Series need a SAS controller installed to work with SAS drives

5. If a 2nd processor is installed, the 2nd processor must match (matched pairs) existing installed Intel Xeon processor.

7. Mixing ECC (Error Correcting Code) and non-ECC is not allowed.

Changing the base warranty start date without purchasing a warranty upgrade or extension

Can the base warranty start date be changed to match the purchase date when no warranty upgrade has been purchased?	Yes. The customer has to provide a proof of purchase to the registration team and the start date will be changed manually.
----------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------

Purchasing and registering warranty upgrades and extensions

How does the customer contact the registration support team?	There are two registration support email addresses, depending on the product. In the first instance, look at the instructions on the registration email or physical pack. The correct email address is provided there. If in doubt, use LSR@lenovo.com and the email will be directed to the correct team.
When and how can the purchase and warranty start date be changed?	<p>If the registration takes place less than 180 days after the system left the factory, the customer can enter the purchase date at the time of registration. (Note that this will be less than 180 days after the purchase date, because of the delay between leaving the factory and being sold. The customer will not know the factory date, but will receive an error if they try to change the purchase date outside of the 180 days. See below)</p> <p>If the registration takes place greater than 180 days after the system left the factory, the customer has to provide a proof of purchase to the registration team and the start date will be changed manually. (Note that this will be less than 180 days after the purchase date, because of the delay between leaving the factory and being sold. The customer will not know the factory date, but will receive an error if they try to change the purchase date outside of the 180 days. See below)</p> <p>If the registration is being processed greater than 180 days after the system left the factory and the customer tries to change the purchase date, they will see:</p> <ul style="list-style-type: none"> a) SPRT (generally Think-branded products) - error message (status 2 - Purchase date difference, status 11- Out of warranty, status 15 -Purchase date difference). b) SRS (generally Idea-branded products) - registration will be processed but dates won't be changed. Customer will receive a confirmation email with error Override not within allowed range. c) Physical Packs (all products) - registration won't be carried out until the customer sets the date to an earlier date, within the 180 days, or leaves the purchase date blank.
When can a warranty upgrade be purchased and registered?	A warranty upgrade can be purchased and registered at any time during the base warranty period. For example, if the base warranty is 1 year, the upgrade can be registered at any time during the first year. If the base warranty is 3 years, the customer has 3 years to register the upgrade.
When does the warranty upgrade or extension start?	The upgrade or extension starts at the beginning of the base warranty period. Note that extensions names describe the full warranty period. For example, a 4 year warranty upgrade means 4 years from the base warranty start date.
Will the customer lose out by purchasing a warranty extension at either the beginning or end of the base warranty period?	No. The extension period is the same, regardless of when the extension is purchased and registered.
Will the customer lose out by purchasing a warranty upgrade (increased service level) at the end of the base warranty period?	The customer will receive the full extension period, but will lose the benefit of the increased service level for the time already expired. For example, if a customer purchases a 3 year onsite upgrade for 1 year carry-in base warranty at the end of the first year, they will get the full 2 years extension, but will only benefit from 2 years of the 3 years upgrade to onsite. The first year will already be finished. Lenovo does not provide any discounts or concessions in this case.
What is a post warranty service?	Post warranty services are designed for systems where the warranty cover has already expired. They are not used for standard extensions when the system is still within the base warranty period.
Can a customer purchase a post warranty service?	Lenovo no longer offers standard post warranty services. Post warranty services will only be sold in special circumstances, using a special bid process. Each special bid will be priced manually. Post warranty services will not be available for small quantities of machines. Lenovo may refuse requests for post warranty services.
I used to sell post warranty services for all extensions of 1 year. What do I do now?	If a system is still in its warranty period, there is a standard service available for it and a post warranty service is not needed.

Find all standard ThinkPlus and Lenovo Care service offerings listed in the last version of the **Lenovo Western Europe Selection Guide** available on LPN for download now! Userfriendly search features, hardware-service compatibility, pricing, service descriptions and more.
